WHY OUR CLIENTS CHOOSE US:

ASBESTOS MANAGEMENT SERVICES

BEC's accredited and appropriately licensed professionals conduct accurate asbestos surveys and analyze samples using Polarized Light Microscopy (PLM) by NVLAP-accredited and state licensed/certified laboratories. These services include:

- Building surveys to identify asbestos-containing materials
- Asbestos abatement design specifications and contract documents
- Abatement project management
- Contractor oversight and air monitoring

LEAD BASED PAINT SERVICES

BEC performs a risk assessment to evaluate potential sources of lead poisoning including paint, lead in dust, lead in drinking water, and even lead hazards from adjacent buildings or other off-site sources. BEC specific service include:

- Paint inspections, surveys, and sample collection
- Lead hazard assessments
- Lead-based paint abatement design
- Abatement Contractor oversight
- Post-abatement clearance sampling
- Air, bulk and dust sample collection and analyses

INDOOR AIR QUALITY

BEC is knowledgeable about regulatory rules and mandates regarding indoor air quality standards. Our staff are trained as licensed air monitoring technicians. Our Indoor Air Quality Services include:

- Investigation of indoor air pollutant sources
- Assessment of heating, ventilating and air conditioning (HVAC) systems
- Air sampling for chemical and bioaerosol pollutants
- Source sampling for mold
- Remediation design
- Contractor oversight during abatement
- Clearance sampling after completion of abatement

MOLD SERVICES

BEC evaluates building HVAC systems in affected areas looking at comfort factors like O2 and CO2 levels, temperature, relative humidity, and overall equipment maintenance and operation. BEC then investigates the area in question to determine potential sources of chemical and biological contaminants. Mold Assessment Services include:

- Mold Assessment Inspections
- Investigations and Complaint Response
- Abatement Management and Air Monitoring
- Final air clearance standards
- Remedial recommendations for architectural, mechanical or plumbing changes
- Bidding coordination
- Contract administration & Contractor oversight
- Management Programs
- Cost Estimates
