

WHAT WE DO:

BEC offers a wide variety of services in environmental sciences, archaeology, historic preservation, and expertise in policies and regulations set forth by the following organizations:

Driven by Quality
Motivated by Service
Inspired by the Environment

WHO WE ARE:

BEC is a full-service environmental consulting firm headquartered in Dallas, Texas. Founded in 1991, BEC continues to provide progressive, professional, and practical consulting services and offers straightforward, cost-effective solutions to environmental issues. Our clients include Fortune 500 companies, large municipalities, and government entities throughout the United States. Our extensive experience in a variety of industries makes BEC a top choice for our clients' needs.

WHY OUR CLIENTS CHOOSE US:

QUALIFIED AND LICENSED TEAM

BEC employs licensed and qualified employees to assist in Oil & Gas projects. BEC is a member of the ISNetwork system and can assist in a variety of assessments and surveys.

Processing Plant and Compressor Stations. In addition to these surveys, BEC can conduct habitat surveys to evaluate the impact to threatened and/or endangered species.

STORM WATER SERVICES

BEC's staff prepares Storm Water Plans (field wide, as well as individual well pad and pipeline plans) and perform Storm Water Inspections during and after construction activities. BEC has worked in Texas, Oklahoma, Wyoming, Colorado, and North Dakota on federal, state, and private land for Oil and Gas operators. Additionally, BEC can assist our clients conducting land reclamation and can assist with storm water design, installation, and monitoring as well as ensure our clients are in compliance with state regulations. BEC can perform these services across the United States.

ENVIRONMENTAL REPRESENTATIVE FOR OIL AND GAS FACILITIES TO BE CONSTRUCTED ON BLM LAND

BEC is well versed in Bureau of Land Management (BLM) Land projects and can represent Oil and Gas Operators with their proposed sites. BEC can attend preconstruction BLM on-site meetings on behalf of the Oil and Gas Operator. On-site meetings consist of review of the proposed construction on BLM land with BLM, Fish & Game, contract & BLM archeologists, contract surveyors, and contract biologic consultants all present. BEC conducts presence/absence wildlife surveys for raptors and wildlife prior to, during, and post construction of Oil and Gas well pads & infrastructure across the United States.

WETLAND AND JURISDICTIONAL WATERS DELINEATION, THREATENED & ENDANGERED SPECIES HABITAT SURVEY AND ARCHAEOLOGY SURVEY

BEC can perform wetland assessments, delineation plans, and archaeology surveys to determine the extent and approximate boundaries of potential jurisdictional wetlands and/or waters of the U.S. for sites located within the proposed location of a Natural Gas

ARCHAEOLOGY

BEC employs Cultural Resources Specialists with a wide range of backgrounds and specialties. BEC can provide Cultural Resources Identification Surveys, National Register of Historic Places (NRHP) testing, data recovery, and mitigation services to complement our environmental services, providing a full range of services to aid clients in their permitting process. BEC's staff can consult with clients to tailor a project to suit their needs, while meeting local, state, and federal regulations.
